01

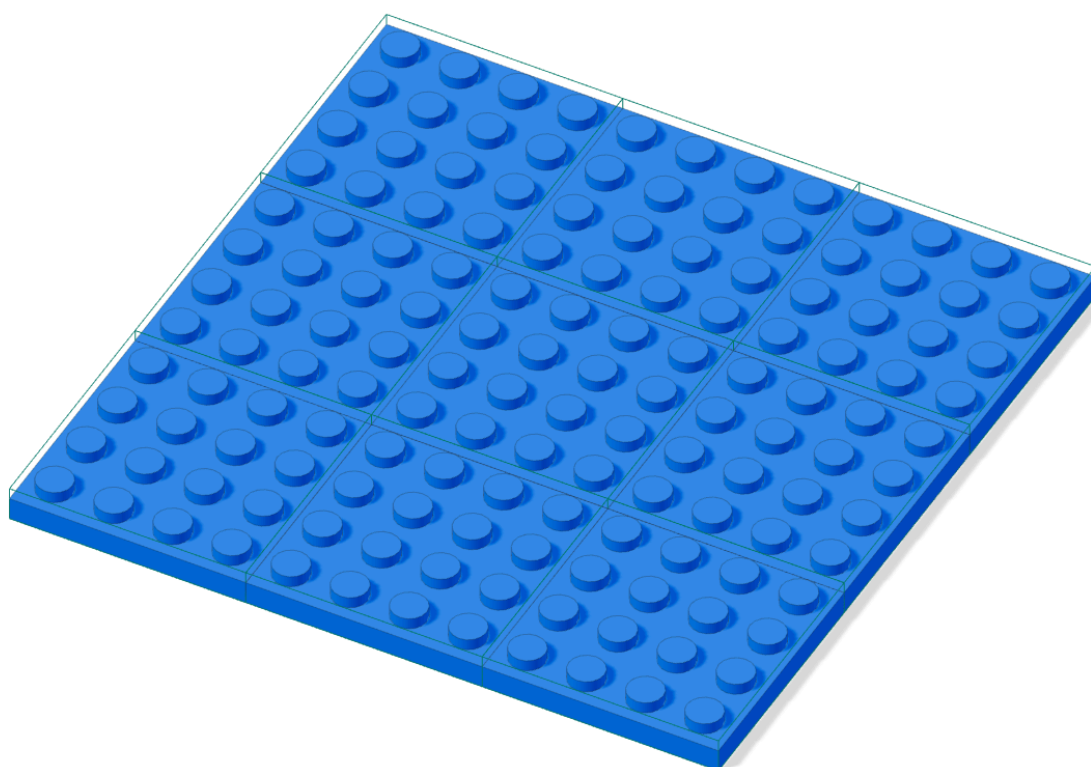

FOUNDATION

Waterline

9x

3031

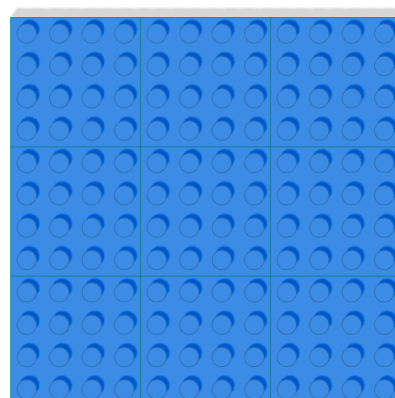

Arrange nine blue plates in a 3 by 3 square on a flat surface. The next step joins them.

□ New pieces are outlined in green.

Keep the entrance facing you.

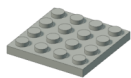

VIEW FROM ABOVE / FRONT AT BOTTOM

02

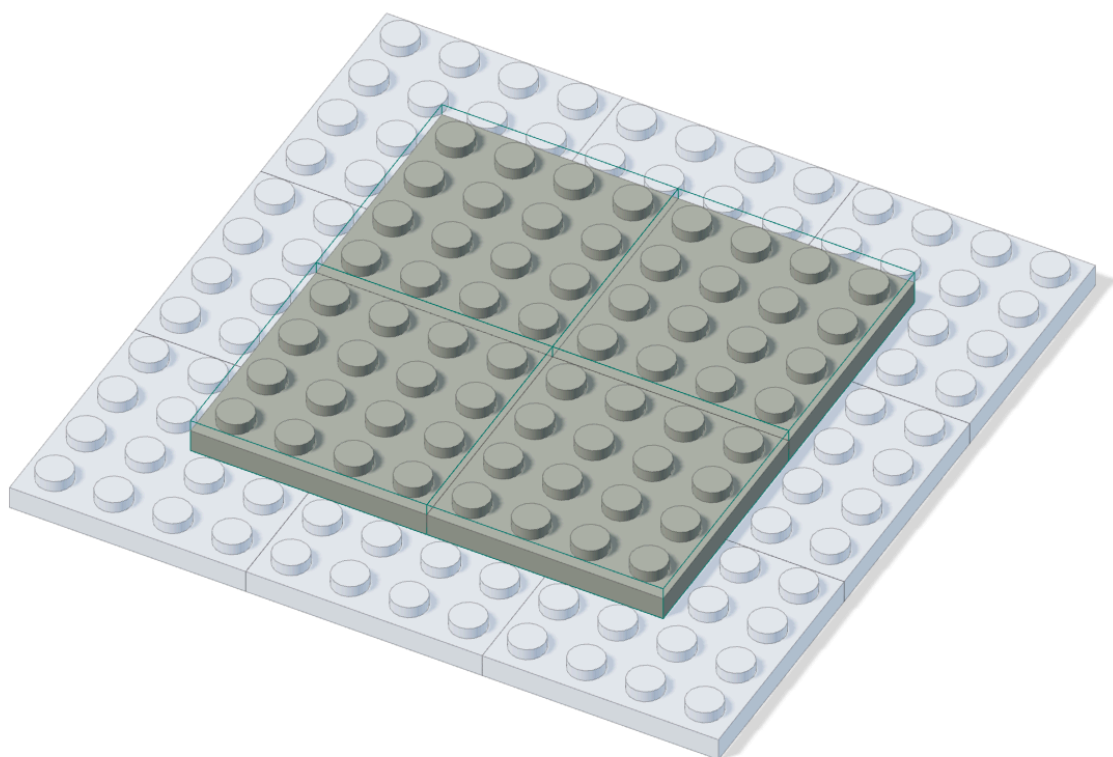

FOUNDATION

Join the island

4x

3031

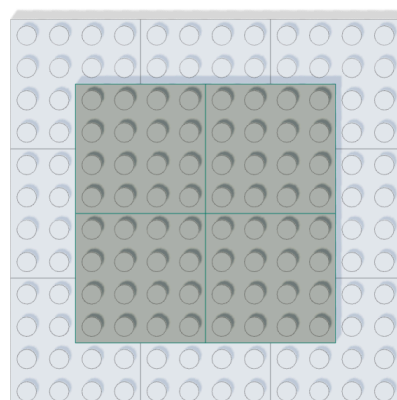

Center the gray plates with a two-stud blue border. Each gray plate bridges the blue plate seams.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

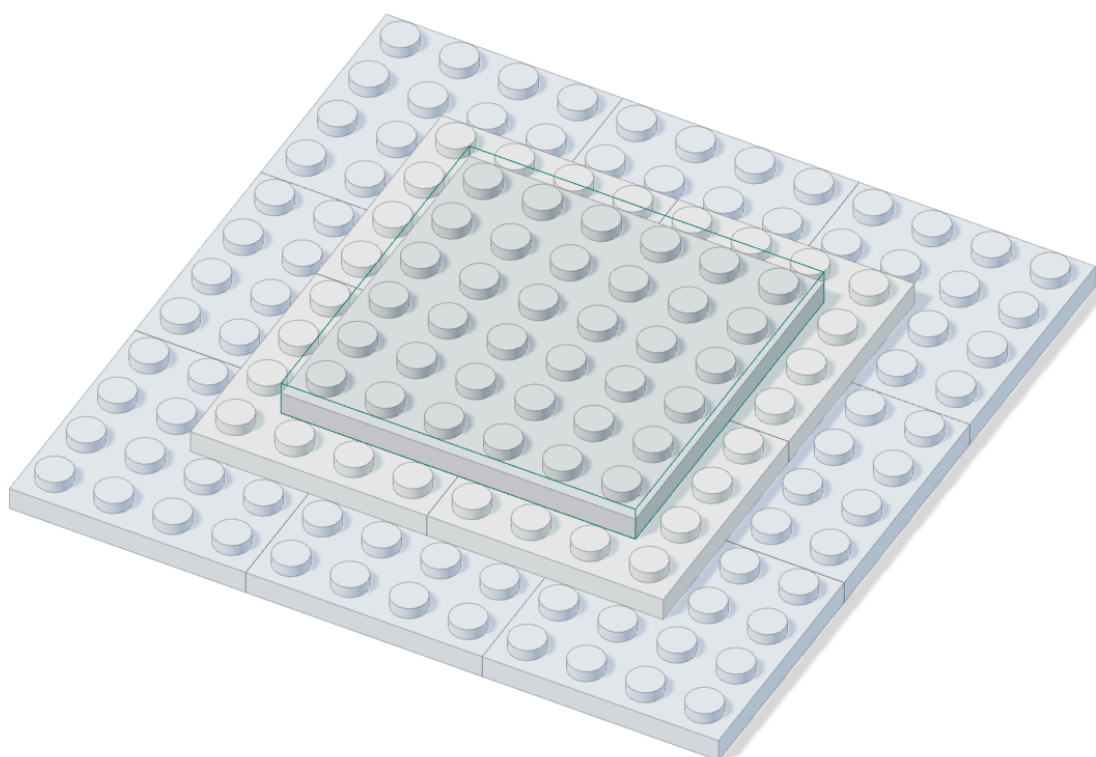

03 FOUNDATION Tower footing

1x

3958

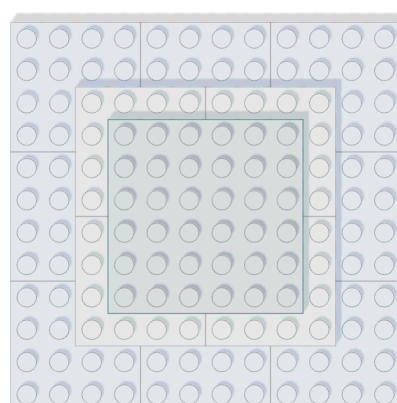

Center the six-stud plate on the island, leaving a one-stud gray border.

☐ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

04 TOWER Entrance

3x

1x

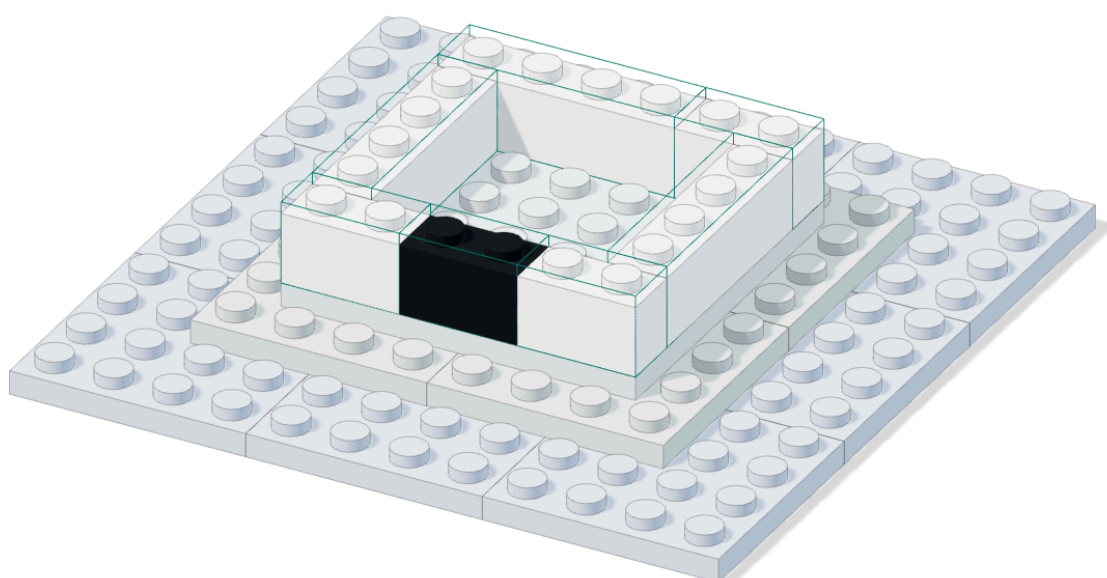

3x

3004

3004

3010

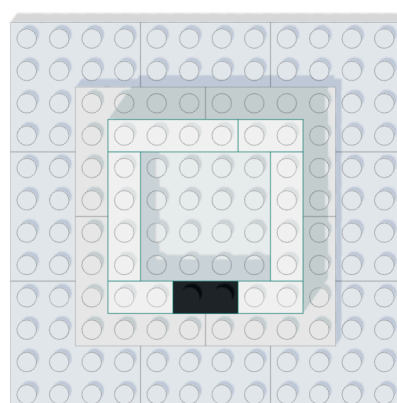

The black brick faces the front. Leave the center of the tower hollow.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

05 TOWER Door lintel level

3004

3x

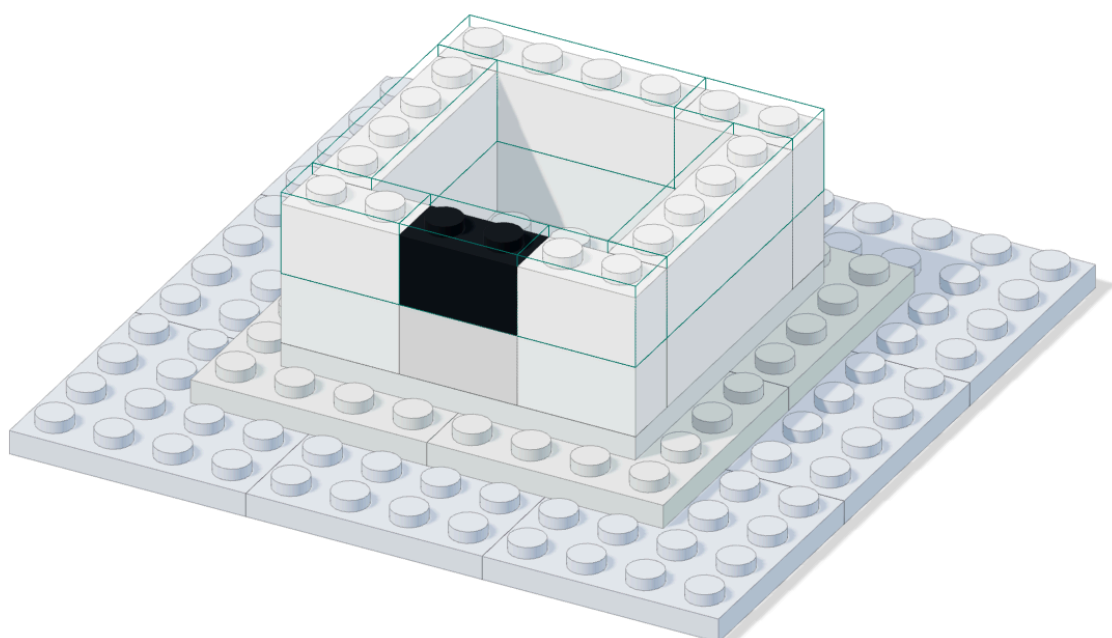

3004

1x

3010

3x

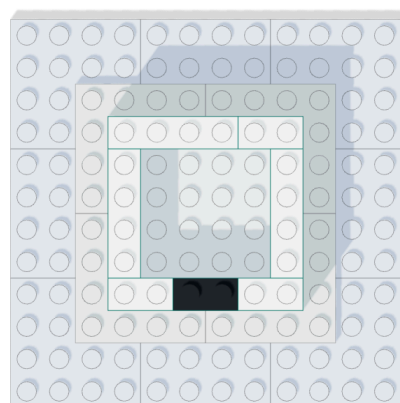

The black brick faces the front. Leave the center of the tower hollow.

VIEW FROM ABOVE / FRONT AT BOTTOM

 New pieces are outlined in green.

Keep the entrance facing you.

06 TOWER First red band

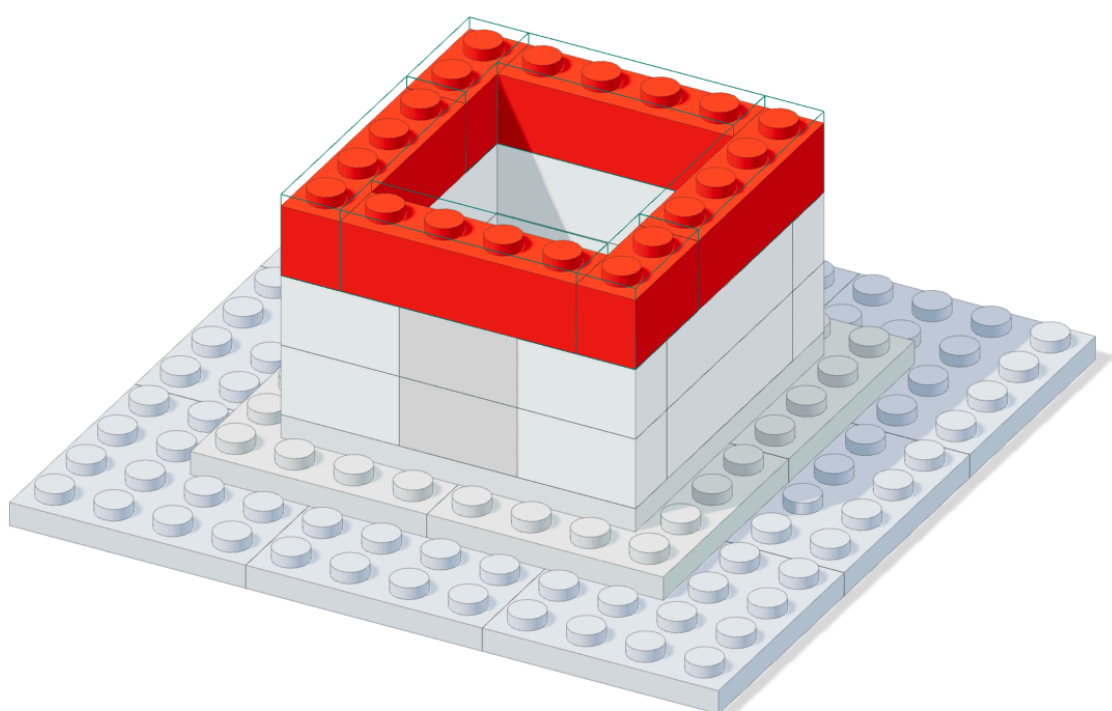

3010

4x

3004

2x

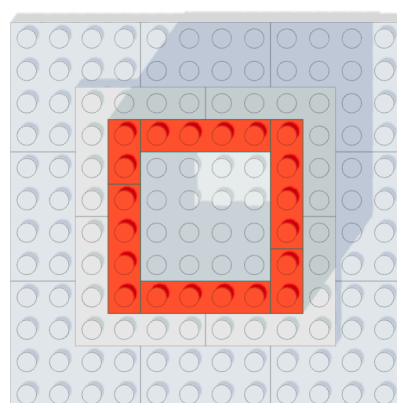

Follow the joint pattern shown. The hollow center stays open.

☐ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

07 TOWER Complete the red band

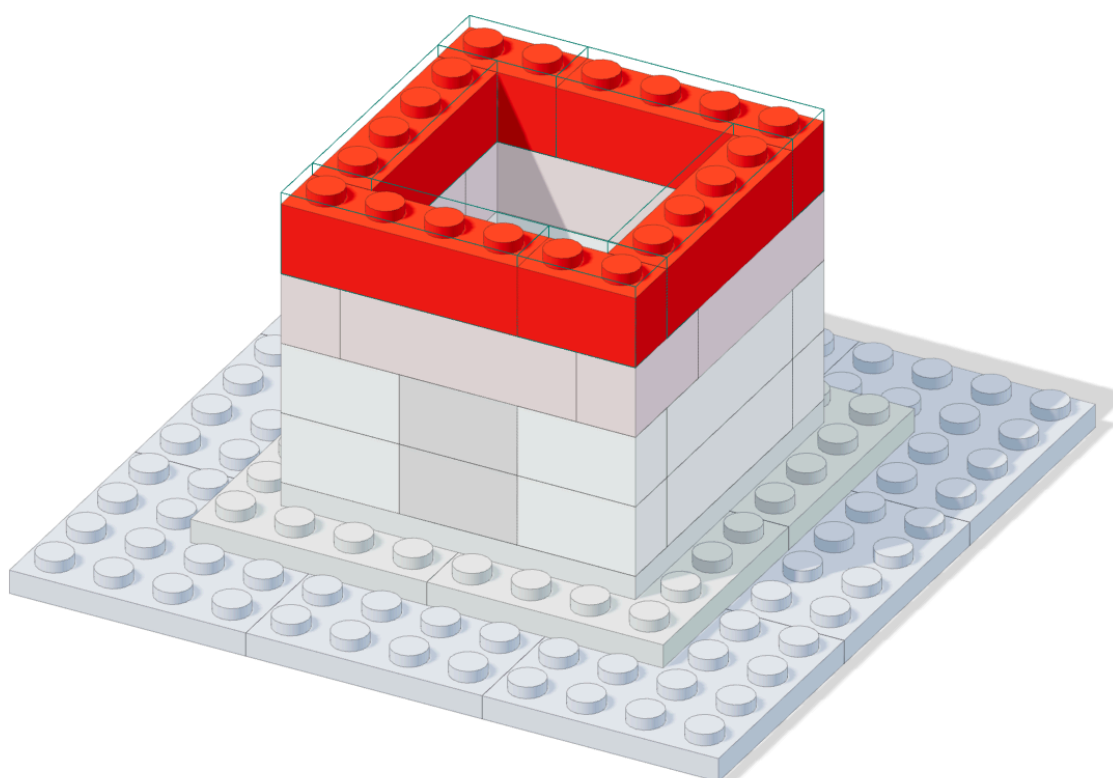

3010

4x

3004

2x

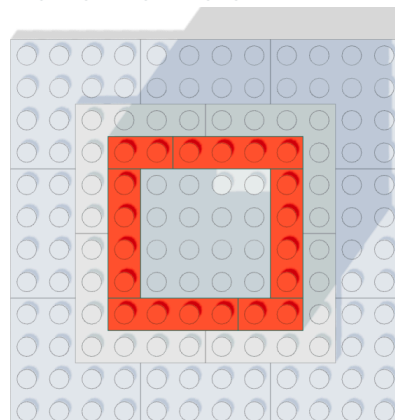

Follow the joint pattern shown. The hollow center stays open.

 New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

08 TOWER White tower

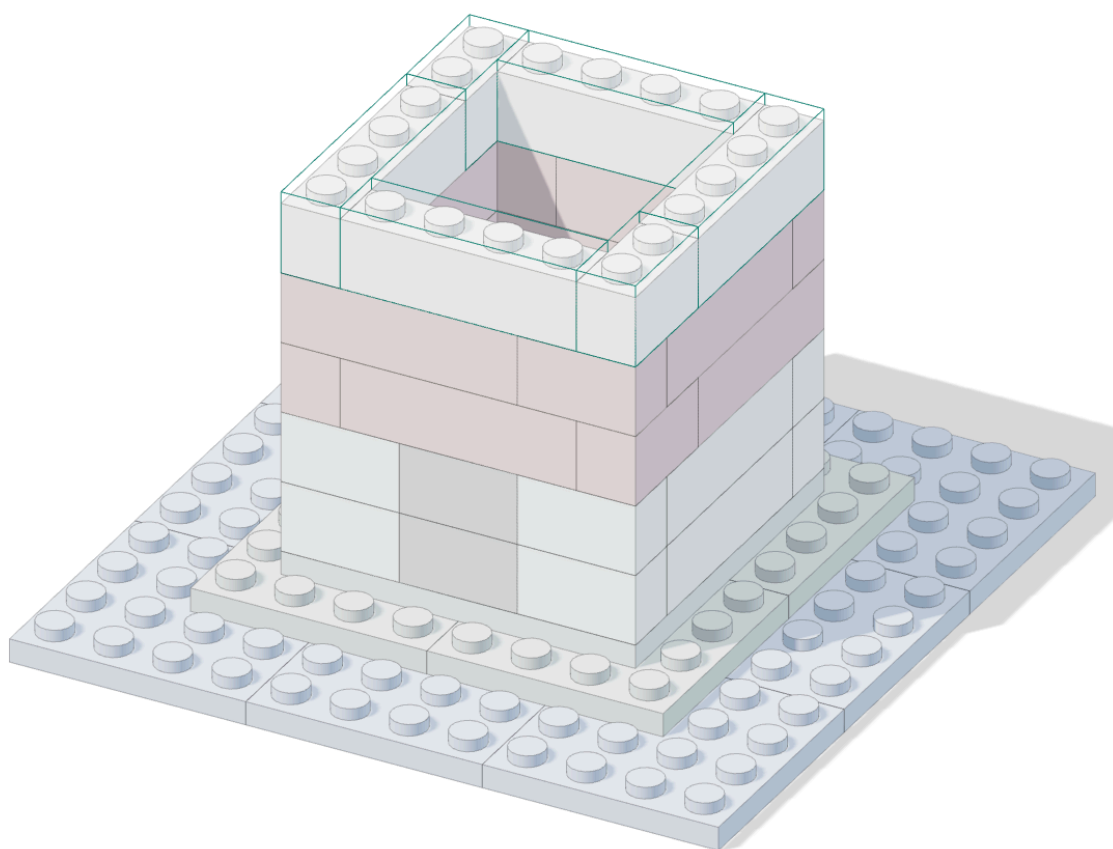

3010

4x

3004

2x

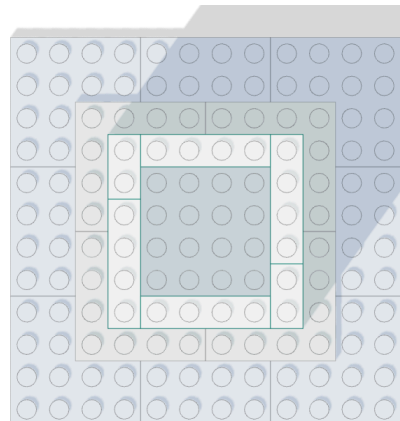

Follow the joint pattern shown. The hollow center stays open.

 New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

09

TOWER

Complete the lower tower

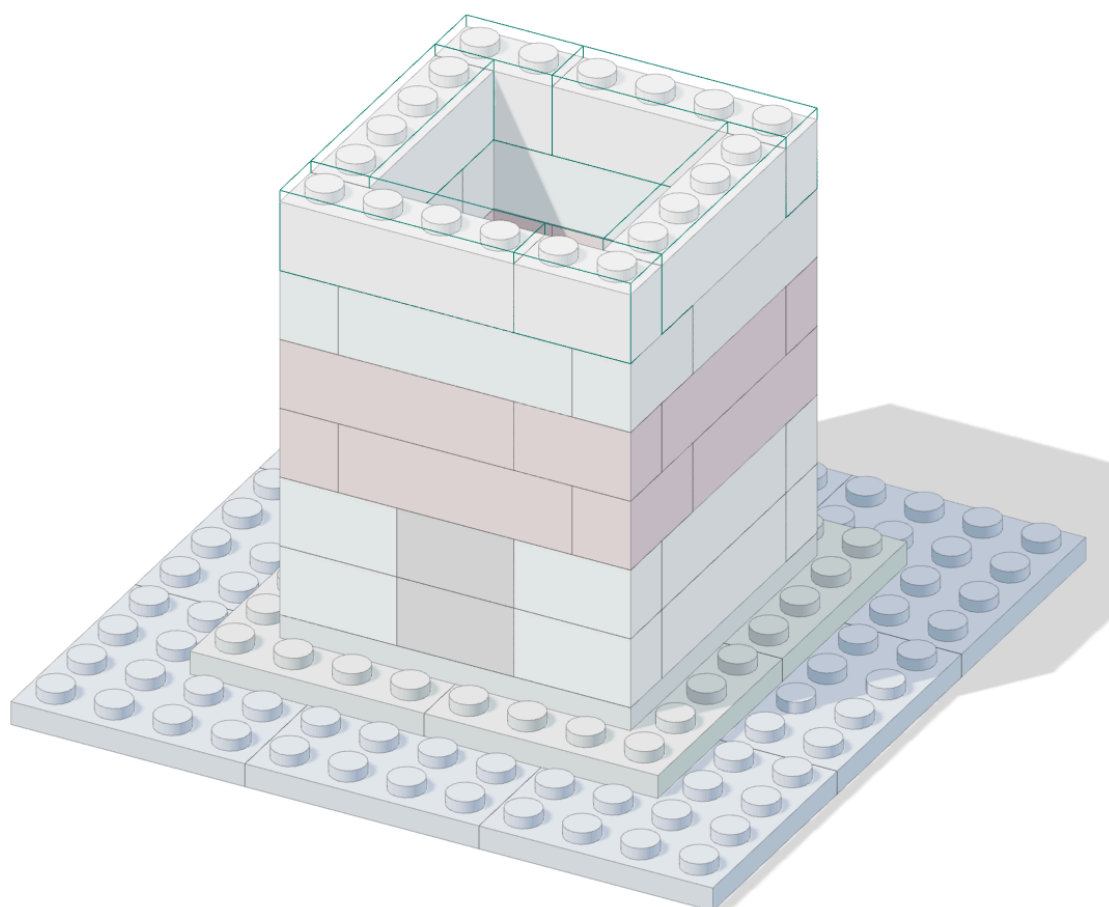

3010

4x

3004

2x

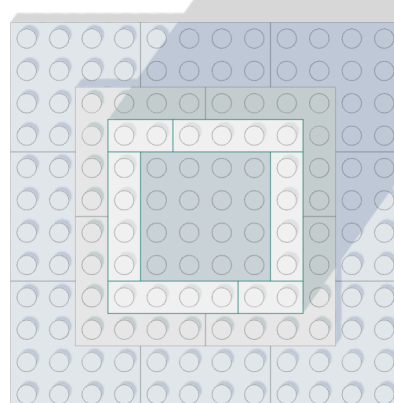

Follow the joint pattern shown. The hollow center stays open.

 New pieces are outlined in green.

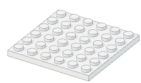

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

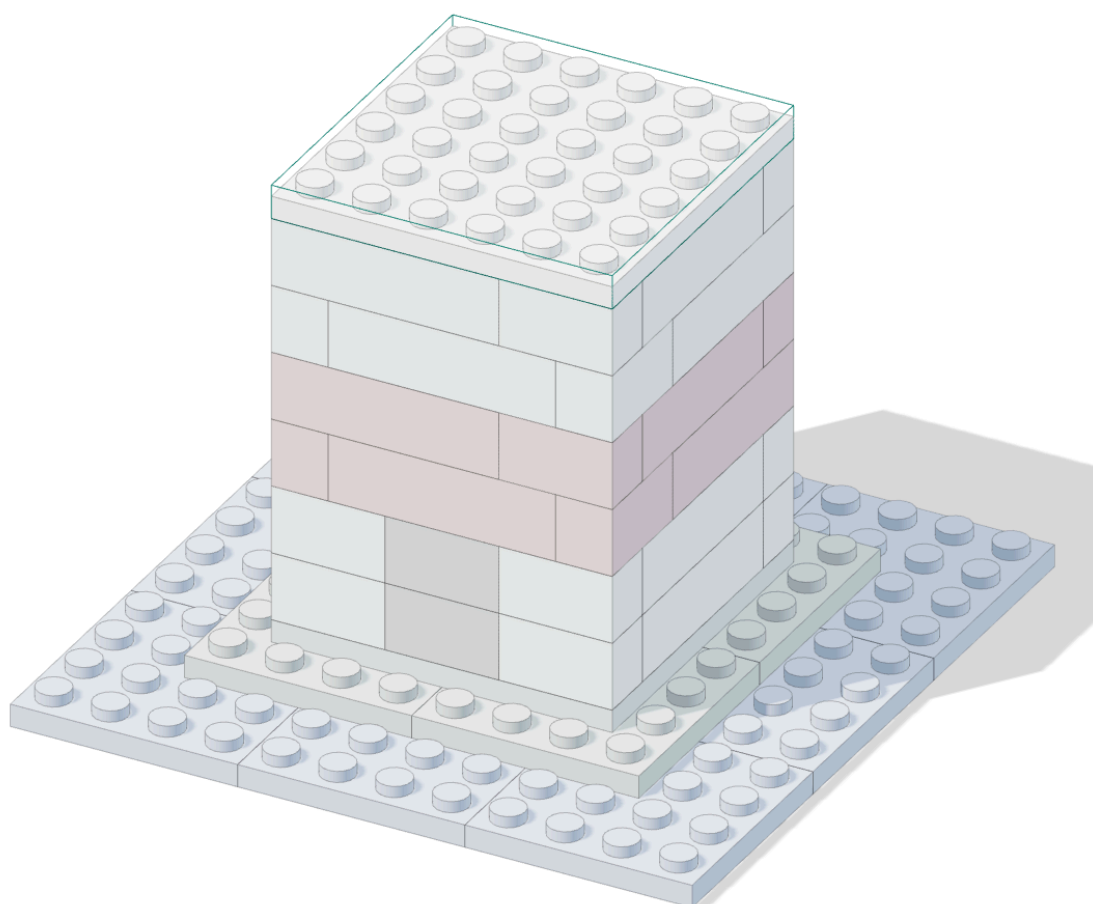

10

TOWER
Shoulder

1x

3958

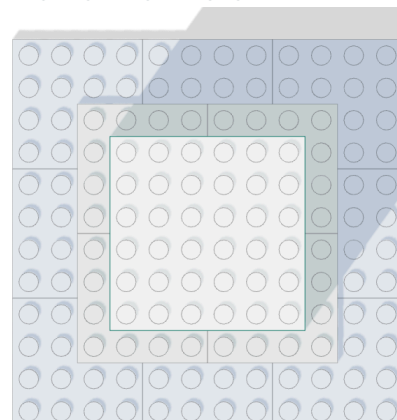

This plate closes the lower tower and supports the narrower upper section.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

11

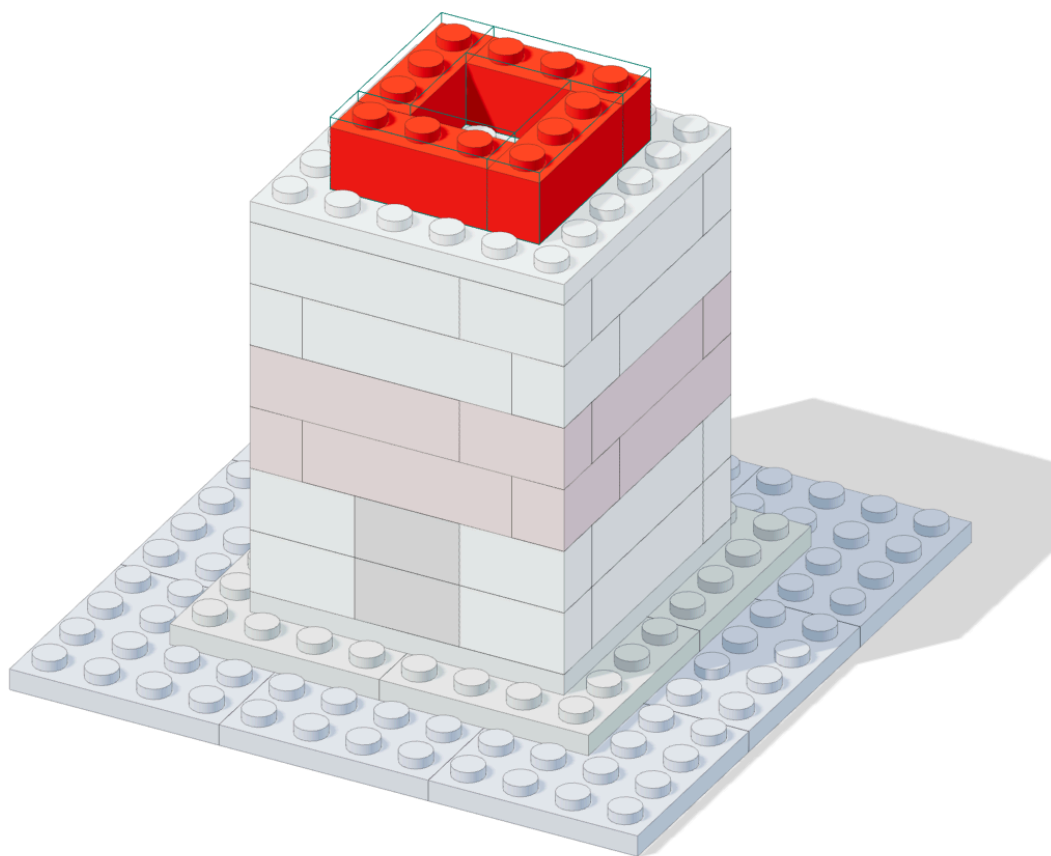

TOWER

Upper red band

4x

3622

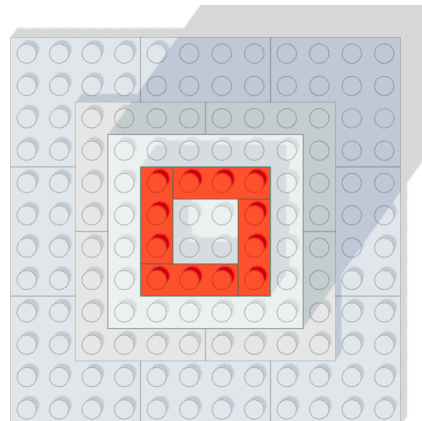

Four bricks form a hollow square. Alternate the corner joints as shown.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

12

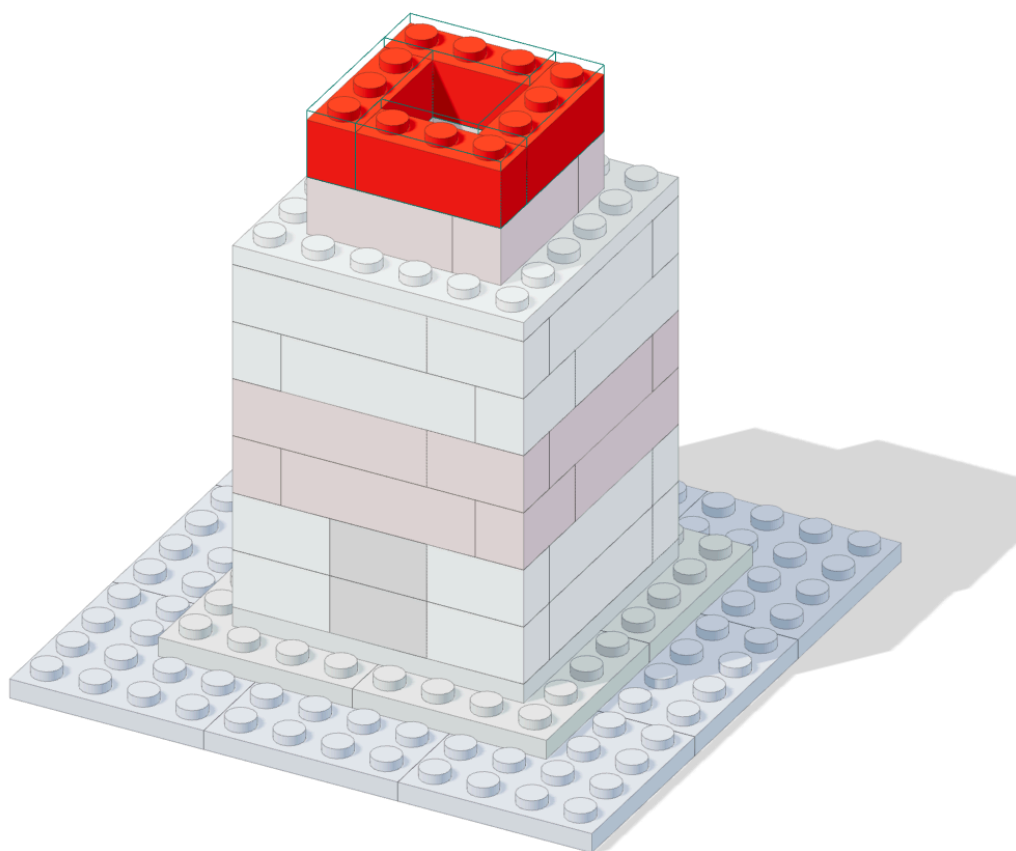

TOWER

Interlock the corners

4x

3622

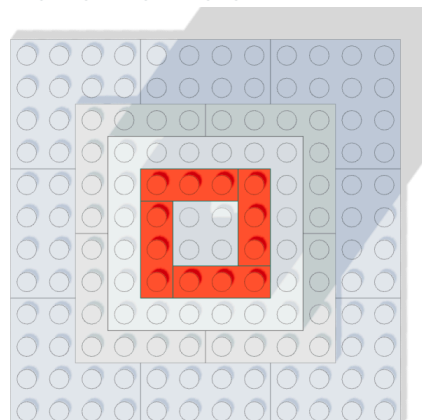

Four bricks form a hollow square. Alternate the corner joints as shown.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

13

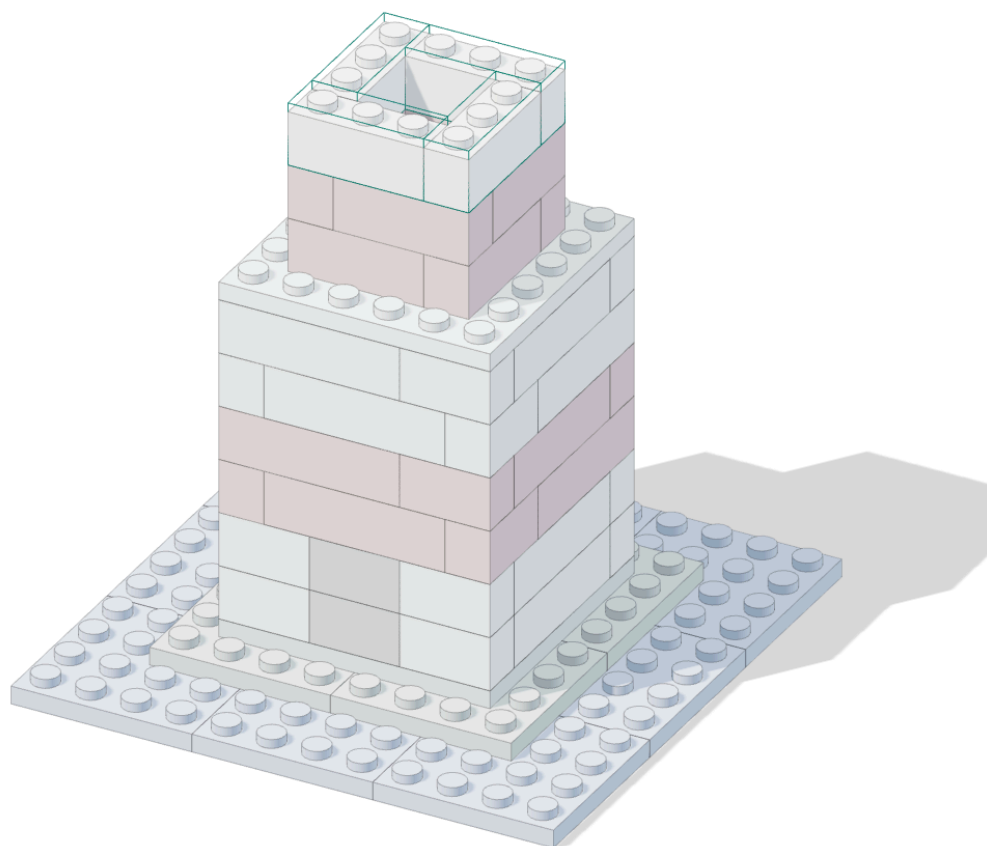

TOWER

Upper white band

4x

3622

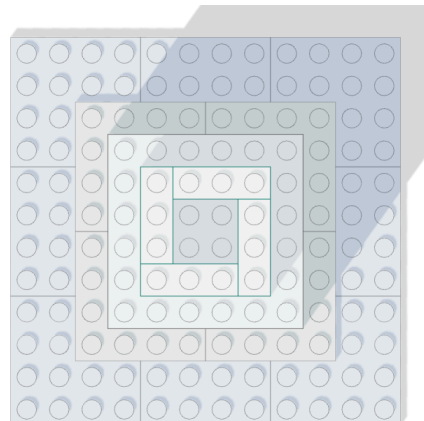

Four bricks form a hollow square. Alternate the corner joints as shown.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

14

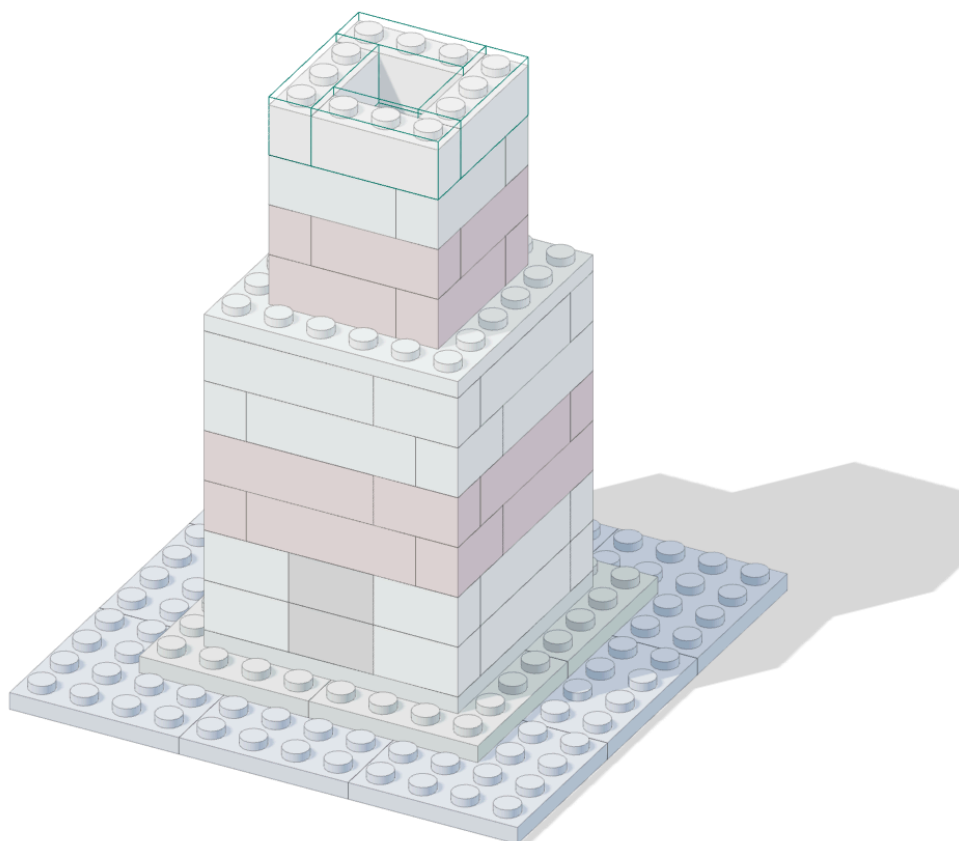

TOWER

Complete the white band

4x

3622

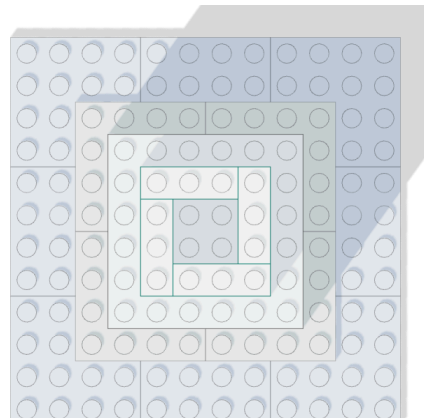

Four bricks form a hollow square. Alternate the corner joints as shown.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

15

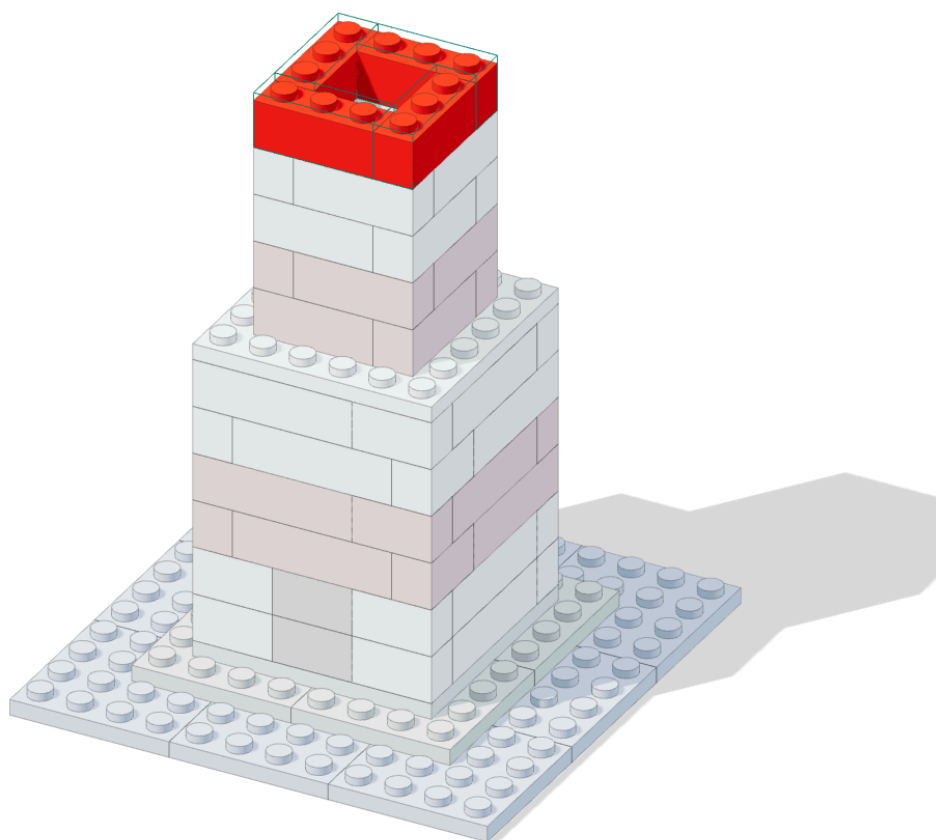

TOWER

Final red band

4x

3622

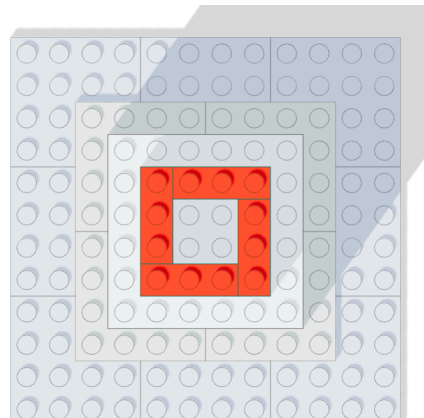

Four bricks form a hollow square. Alternate the corner joints as shown.

□ New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

16

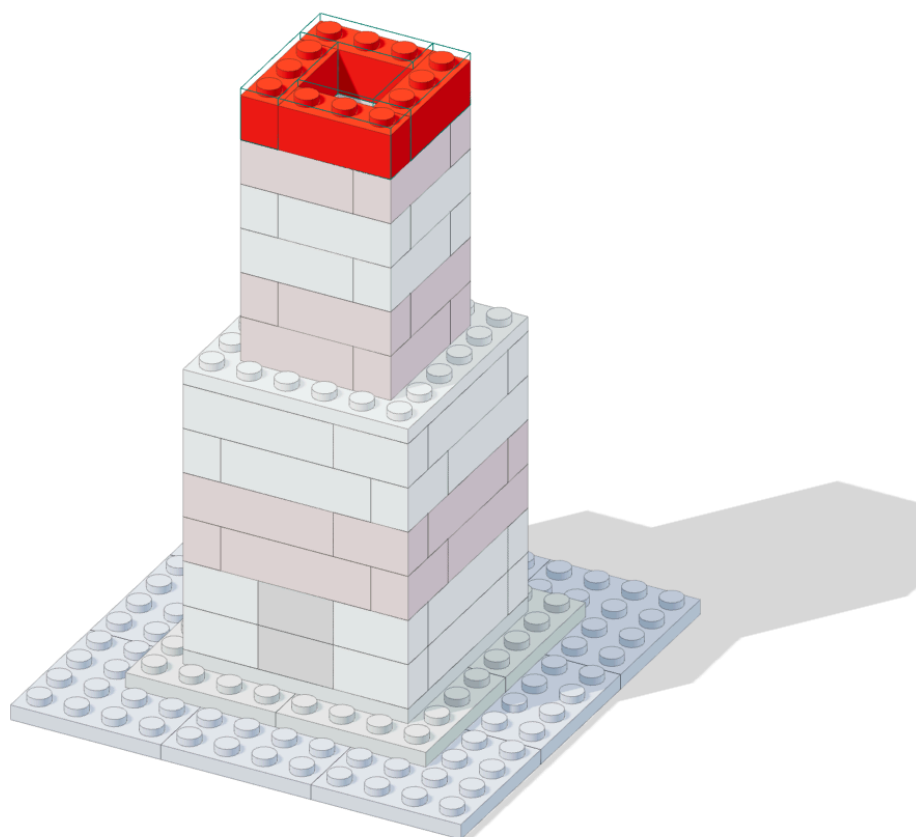

TOWER

Complete the tower

4x

3622

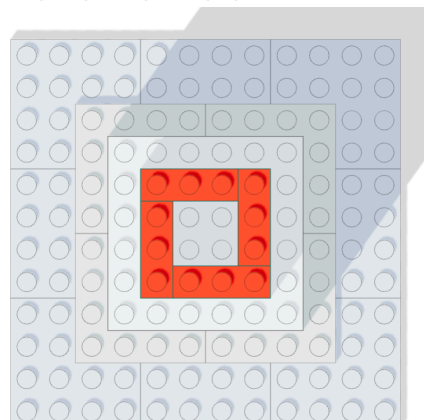

Four bricks form a hollow square. Alternate the corner joints as shown.

 New pieces are outlined in green.

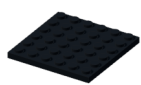

Keep the entrance facing you.

FINISHING

Sea foam

3069b

4x

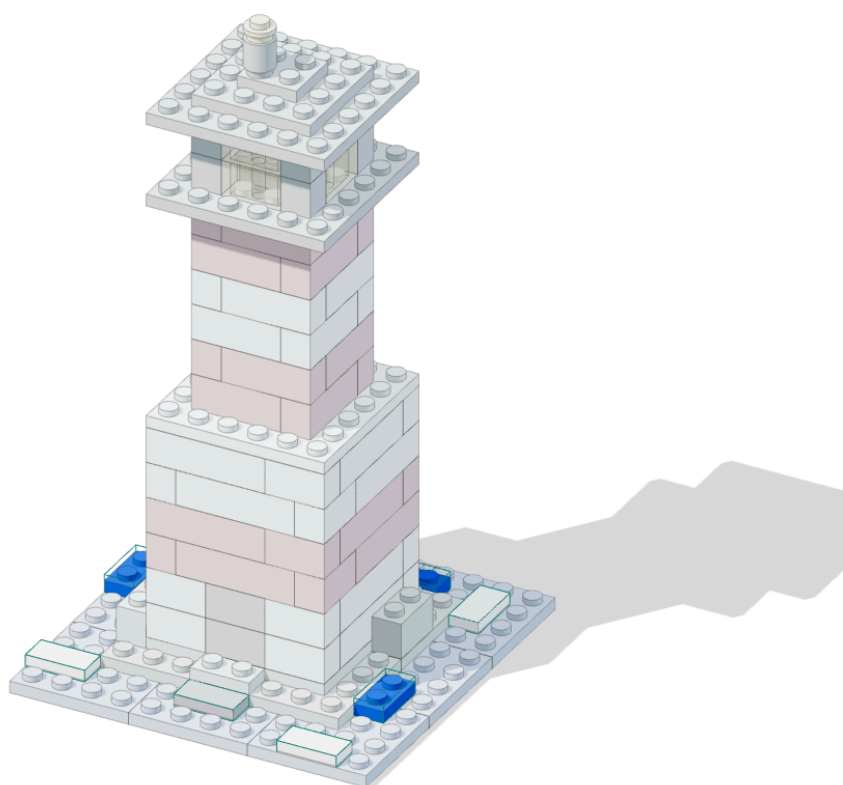

3023

3x

3069b

1x

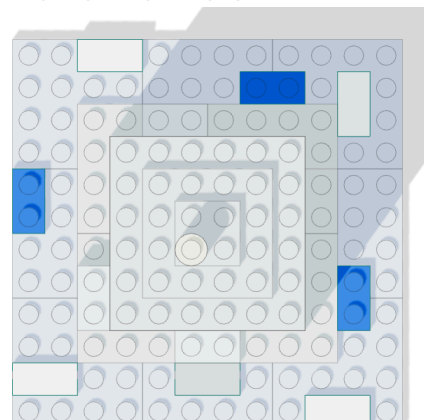

Add the white tiles and blue ripples to the water.

 New pieces are outlined in green.

Keep the entrance facing you.

VIEW FROM ABOVE / FRONT AT BOTTOM

Your light on the coast.

Build notes

The base measures 12 x 12 studs (9.6 x 9.6 cm). The model is approximately 17.5 cm tall, including the top stud. Lift it by the base.

This design uses 111 catalogued LEGO parts across 24 part/color lots. The nine water plates start separately; the island plates join them in step 2.

What was checked

Nominal brick-body overlaps, stud-grid alignment, upright support connections, vertical insertion paths and final connectivity were checked in code. The rendered geometry was measured against the design dimensions. These checks do not replace a physical trial build; clutch strength and structural loads have not been tested.
